

Perfect Finish Line

Smooth, glowing skin
without imperfections

Combines make-up effect
with skincare, by using:

3 Peptide Viper

cosmetic raw material that was developed at the Poplawska Group Laboratory for optimal care of mature skin. A synthetic tripeptide that mimics the action of a peptide found in viper venom. Causes a slight and temporary weakening of facial muscles, which contributes to the inhibition of contractions that cause the formation of facial wrinkles. Prevents the formation of wrinkles by inhibiting muscle contractions
