

Podo Line

Professional foot care that softens,
regenerates and restores comfort

The therapy uses high concentration of active ingredients:

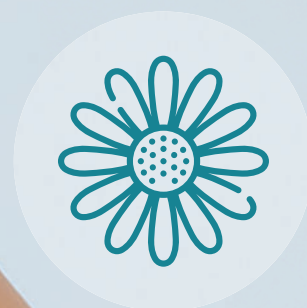

Sodium Lactate

acts as a mild exfoliant, helping to remove dead skin cells from the surface, which improves skin texture and firmness. Stimulates collagen production, helping to improve skin elasticity and reduce wrinkles. Exhibits antibacterial activity

Lactic acid

an ingredient with extremely rich properties. It increases the production of collagen and elastin, protects the skin from water loss, effectively removes dead skin and exhibits antibacterial activity

Calendula extract

has anti-inflammatory and antibacterial effects. Thanks to its antioxidant properties, it increases the rate of skin regeneration, in addition, it soothes irritation, moisturizes and softens the epidermis. It also has astringent and sebum-regulating properties
